Status

Delivered

Pending

Insight:

This shows how much has been spent in each country where orders are still pending. A map visualization can be a powerful visual aid to quickly spot regional trends

Message:

This chart highlights countries with the highest pending delivery amounts, giving a visual representation of regions where operational delays may impact revenue collection

Quick measure

Insight:

Stakeholders can quickly identify key customers, their purchasing behavior, and the products they most commonly buy

Message:

This visualization helps identify our top customers and the products that contribute to their purchases, which allows us to target customer-specific marketing strategies

Quantity By Country

Insight:

Visualizes product demand in different regions, allowing stakeholders to see where certain products are performing best

Message:

This chart shows the highest-demand products in each country, enabling regional product planning and distribution optimization

Product Preferences by Age Group

AgeCategory	
<30	>30

Insight:
The chart compares product preferences across age groups. A grouped bar chart can show the top products for each age category side-by-side, while a pie chart can visualize age group contributions to product purchases.

Message:
This visualization highlights differences in product preferences based on age, informing marketing and product positioning strategies for different demographics

AgeCategory	DDR RAM	Harddisk	Headset	Keyboard	Monitor	Mouse	Mousepad	Webcam	Total
<30	8	5	7	15	8	7	17	9	76

Total	25	25	25	49	25	25	50	25	249

Country with Minimum Transactions and Sales

Country with Minimum Transactions and Sales Amount

Insight:

Quickly identifies the underperforming country, which can lead to discussions on regional strategies, market penetration, or customer behavior.

Message:

This visualization identifies countries with minimal engagement and revenue, helping us focus on regions that need further analysis or growth initiatives.
